

INVENTÁRIO DAS EMISSÕES DE GASES DE EFEITO ESTUFA DA FUNDAÇÃO UNIVERSIDADE FEDERAL DE MATO GROSSO DO SUL
NA MOVIMENTAÇÃO DE PESSOAS E BENS – ANO 2025

Neste documento são apresentados dados relativos à **Emissão de Gases de Efeito Estufa (GEE) pela Universidade Federal de Mato Grosso do Sul (UFMS)**, decorrentes da movimentação de pessoas e bens durante o ano de **2025**.

O escopo do inventário de GEE realizado pela **SETRAN/PREF/PROADI** abrange tanto o transporte terrestre de pessoas e materiais por meio da **frota oficial de veículos da UFMS**, quanto incorpora informações relativas a embarcações, máquinas agrícolas, geradores e outros equipamentos que possam ser fontes emissoras de GEE.

A quantidade de combustível utilizada por cada veículo foi obtida através dos **Sistemas de Gestão de Frotas da SH Informática e da Prime Benefícios**, empresas contratadas pela UFMS para fornecer um sistema integrado de controle de **abastecimento e manutenção de veículos**.

Na página seguinte, são apresentadas as informações referentes ao inventário de GEE dos veículos da UFMS, contendo os seguintes dados: **placa do veículo, modelo, quantidade total e específica de cada combustível utilizado ao longo do ano (em litros), e emissões específicas e total**.

A UFMS tem buscado alternativas para reduzir o impacto ambiental da frota, priorizando o uso de combustíveis menos poluentes e adotando práticas que otimizam a eficiência dos deslocamentos. Apesar disso, medidas como a **renovação da frota** e a **manutenção preventiva dos veículos** devem ser implementadas para **reduzir o consumo de combustível** e, consequentemente, a **emissão de gases de efeito estufa**.

A elaboração deste inventário demonstra o compromisso da UFMS com a **transparência e a responsabilidade ambiental**, fornecendo dados essenciais para a gestão sustentável da frota. Essas informações permitem analisar o impacto das operações de transporte da instituição e servem como base para o desenvolvimento de estratégias que possam **reduzir as emissões de gases de efeito estufa** no futuro.
